

Follow these instructions to prepare your online store for integration with the Live Sale System.  
If you need assistance, please contact [admin@reefs.com](mailto:admin@reefs.com).

## 1. Enable custom apps for your store

The first screenshot shows the 'Apps' section in the Shopify Admin. The left sidebar has a green arrow pointing to the 'Apps' menu item. The main content area has a green arrow pointing to the 'Develop apps' button in the top right corner.

The second screenshot shows the 'App development' page. A green arrow points to the 'Allow custom app development' button at the bottom of the page.

The third screenshot shows a confirmation dialog box titled 'You are about to allow custom app development on your store'. A green arrow points to the 'Allow custom app development' button at the bottom right of the dialog.

← **App development**

**Start developing apps on your store**

Develop your own apps to integrate your store's data with external services or build custom storefronts.

App development should only be done by trusted developers on your team. Apps can give API access to your data, and that data can be accessed outside of Shopify.

All apps are subject to the [Shopify API License and Terms of Use](#).

**Allow custom app development**

**You are about to allow custom app development on your store**

This can't be undone.

Apps are subject to the [Shopify API License and Terms of Use](#).

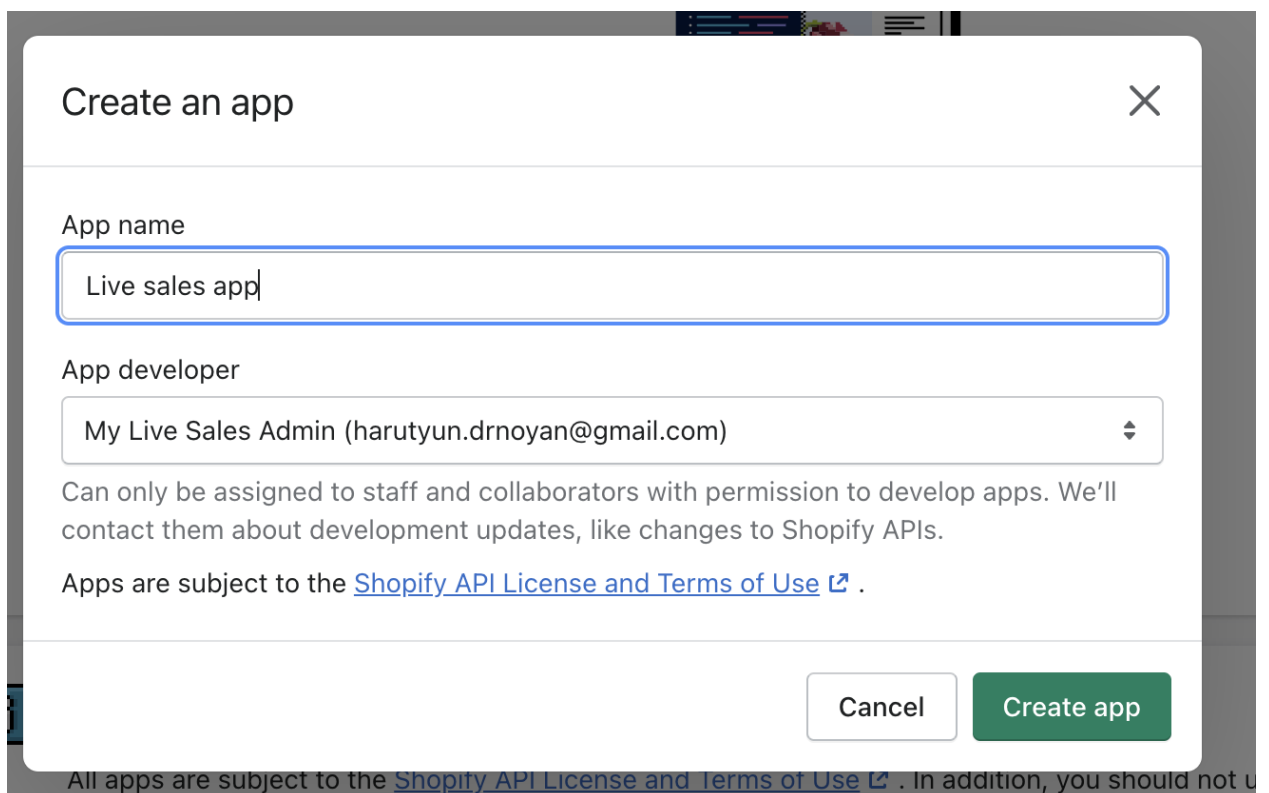

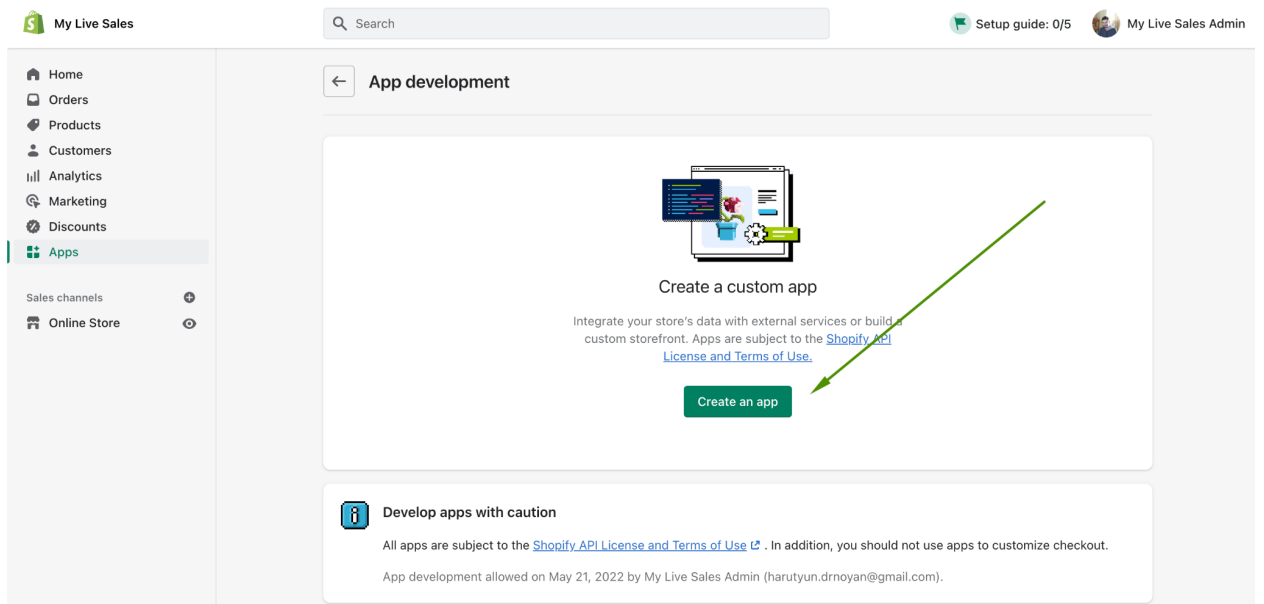

Creating apps generates access tokens that provide API access to your data. You're responsible for keeping these tokens and the data they access secure.

You should only give staff and collaborators that you trust permission to develop apps for your store.

2. Create a new app. Specify any name you want, it will not be directly shown to users on Reefs.com.

### 3. Enable product and inventory access scopes in Storefront scope configuration page:

The first screenshot shows the 'App development > Live sales app' page. The 'Configuration' tab is selected. Under 'Select your access scopes to get started', there are two options: 'Retrieve and sync store data with the Admin API' and 'Develop unique shopping experiences with Storefront API'. A green arrow points to the 'Configure Storefront API scopes' button. The 'Development history' table shows the app was created on May 21, 2022, at 08:49 UTC by harutyun.drnoyan@gmail.com.

The second screenshot shows the 'Storefront API access scopes' configuration page. It lists three categories of scopes: Content, Customers, and Products. Under Products, the scopes 'unauthenticated\_read\_product\_listings', 'unauthenticated\_read\_product\_inventory', and 'unauthenticated\_read\_product\_tags' are checked, while 'unauthenticated\_read\_product\_pickup\_locations' is unchecked.

Save the changes using the Save button on the bottom of the page.

#### 4. Install the app to get required access details:

The screenshot shows the 'My Live Sales' dashboard. On the left is a sidebar with navigation links: Home, Orders, Products, Customers, Analytics, Marketing, Discounts, Apps (highlighted), Sales channels, and Online Store. The main header includes a search bar, 'Setup guide: 0/5', and the user 'My Live Sales Admin'. The main content area is titled 'App development > Live sales app'. It features tabs for Overview, Configuration, API credentials, and App settings. The 'Overview' tab is active, displaying instructions to 'Install to get your access token' and a green 'Install app' button. A green arrow points from this button to the right. Below the instructions is a 'CONFIGURATION' section with a 'Storefront API integration' link and a 'Review configuration' button. On the right, there's a sidebar with links to 'Access store data with the Admin API', 'Develop custom shopping experiences with Storefront API', and 'Authenticate with access tokens'.

The screenshot shows the 'My Live Sales' dashboard with the 'Reefs Live Sales' app installed. The sidebar and header are identical to the previous screenshot. The main content area is titled 'App development > Reefs Live Sales' with an 'Installed' status and an 'Uninstall app' button. The 'API credentials' tab is active. It shows a 'Storefront API access token' with a 'New' label. Below the token name is a text box containing the token '9b955fe255c0fe9362d1c98811b9892a' and a copy icon. A green arrow points to the token. Below the token is the creation date 'Created May 21, 2022 at 08:53 UTC'. On the right, there's a sidebar with links to 'Authenticate with access tokens', 'Start using the Admin API', and 'Start using the Storefront API'.

5. Enter the details on the Edit Live Sale page on Reefs.com

6. Update your products to make sure they are available on the sales channel of the app you have just created:

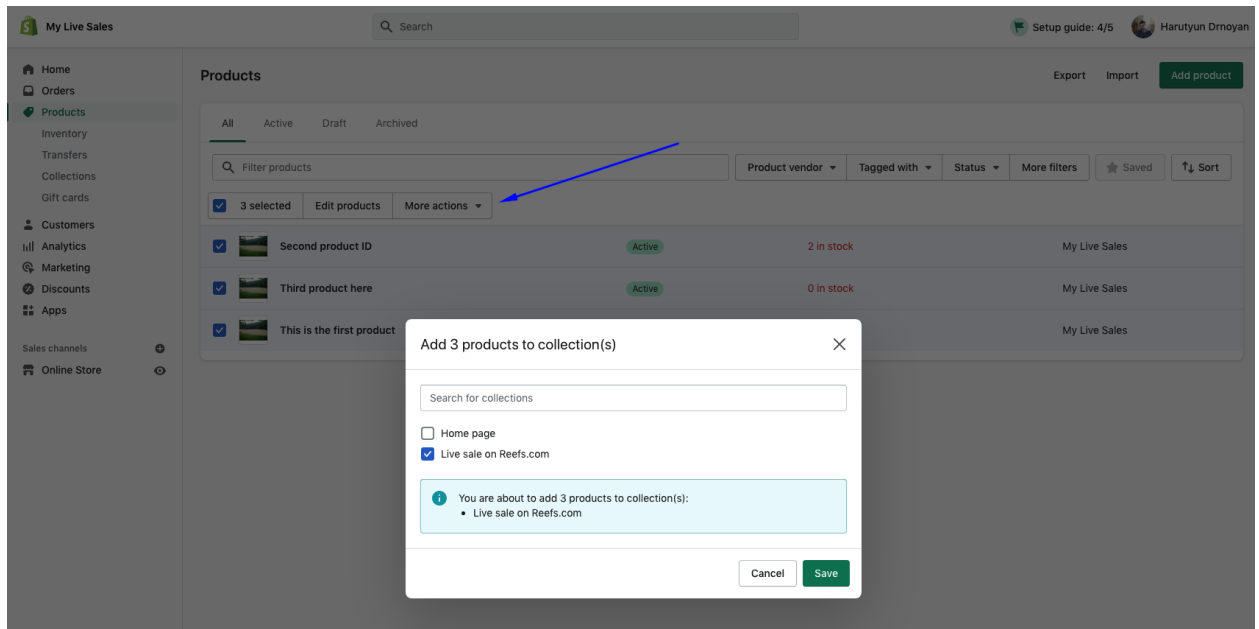

The first screenshot shows the 'Products' section of the 'My Live Sales' app. A sidebar on the left contains navigation links: Home, Orders, Products (selected), Inventory, Transfers, Collections, Gift cards, Customers, Analytics, Marketing, Discounts, Apps, Sales channels, and Online Store. The main area displays a list of products under the 'All' tab. Two products are selected, and a context menu is open over them. The menu options are: Set as active, Set as draft, Archive products, Delete products, Add available channel(s)... (highlighted with a green arrow), Remove available channel(s)..., Add tags, and Remove tags. The product list shows two items: 'Second product' (Active, 2 in stock) and 'This is the first' (Active, 8 in stock), both from 'My Live Sales'.

The second screenshot shows the same 'Products' section, but with a modal dialog titled 'Make 2 products available' open. The dialog contains the text 'Make these products available on:' followed by two checked options: 'Online Store' and 'Reefs Live Sales' (highlighted with a green arrow). At the bottom of the dialog are 'Cancel' and 'Make products available' buttons.

7. Create a collection where you are going to store all products accessible for this sale. Make sure the collection is available on the app's sales channel. It can be hidden from the online store by unchecking the checkbox:

8. Make sure all products you want to sell in the live sale are added to the collection:

9. Save the live sale form to get list if available collections and enter the correct ID in the form:

Oops! We ran into some problems.

☒ Active

 Save

The products are re-fetched from your store automatically while your sale is in progress, every 2 minutes. You can re-fetch all products any time by using the Refetch button:

The products are created as inactive products and their schedule date is set to the end date of the sale. Make sure to edit the product, schedule them and activate:

When a user clicks the Buy Now button in the sale, the quantity available decreases by one. Within 1-2 minutes, we check Shopify inventory and correct the quantity available if needed.

Please note, that it takes some time till any changes made via Shopify web interface (change of product name, price, availability) become available via API, so you please re-fetch the products after 30-60 seconds after making the change, and you should see the changes synced to Reefs.com correctly.
